

ALEXANDRU MIHAI BICA	
<i>Solving delay differential equations by successive interpolations</i>	133 - 140
L. P. CASTRO, K. MURATA, S. SAITOH and M. YAMADA	
<i>Explicit integral representations of implicit functions</i>	141 - 148
KUO-SHOU CHIU and MANUEL PINTO	
<i>Oscillatory and periodic solutions in alternately advanced and delayed differential equations</i>	149 - 158
KRZYSZTOF CIEPLIŃSKI and TIAN ZHOU XU	
<i>Approximate multi-Jensen and multi-quadratic mappings in 2-Banach spaces</i>	159 - 166
CHELO FERREIRA, JOSÉ L. LÓPEZ and ESTER PÉREZ SINUSÍA	
<i>The Picard-Lindelöf's theorem at a regular singular point</i>	167 - 178
J. HARJANI, F. SABETGHADAM and K. SADARANGANI	
<i>Fixed point theorems for cyclic weak contractions in partially ordered sets endowed with a complete metric</i>	179 - 186
MIODRAG IOVANOV	
<i>Non-existence of ground states for a semilinear elliptic system of Lane-Emden-Fowler type</i>	187 - 193
LEONID A. KURDACHENKO and JAVIER OTAL	
<i>On the existence of normal complement to the Sylow subgroups of some infinite groups</i>	195 - 200
XIAOJIE LIN, ZENGJI DU and QIN ZHANG	
<i>Solvability of a second-order differential equation with integral boundary condition at resonance on an unbounded domain</i>	201 - 208
ION MIHOC and CRISTINA-IOANA FĂTU	
<i>Fisher information exponential dispersion family and applications</i>	209 - 216
NIKOLAI NIKOLOV and SVILENA HRISTOVA	
<i>Liouville type theorems on \mathbb{Z}^2 and \mathbb{Z}^1</i>	217 - 222
VALERIU POPA	
<i>On some fixed point theorems for implicit almost contractive mappings</i>	223 - 229
M. M. RODRIGUES and S. YAKUBOVICH	
<i>On a heat kernel for the index Whittaker transform</i>	231 - 238
IOAN A. RUS and MARCEL-ADRIAN ȘERBAN	
<i>Basic problems of the metric fixed point theory and the relevance of a metric fixed point theorem</i>	239- 258
CODRUȚA STOICA and MIHAIL MEGAN	
<i>On nonuniform exponential stability for skew-evolution semiflows in Banach spaces</i> ...	259 - 266
MIHAIL URSUL and MARTIN JUŘAŠ	
<i>Notes on topological rings</i>	267 - 273
BOOK REVIEW	275 - 276
