

RAVI P. AGARWAL, MARTIN BOHNER, TONGXING LI and CHENGHUI ZHANG <i>Oscillation of second-order differential equations with a sublinear neutral term</i>	1 - 6
MARYAM A. ALGHAMDI, VASILE BERINDE and NASEER SHAHZAD <i>Fixed points of non-self almost contractions</i>	7 - 14
ALIREZA AMINI-HARANDI and SZILÁRD LÁSZLÓ <i>Solution existence of general variational inequalities and coincidence points</i>	15 - 22
DORIN ANDRICA and RAMONA-ANDREEA ROHAN <i>A new way to derive the Rodrigues formula for the Lorentz group</i>	23 - 29
H. A. ATIA <i>Separation problem for the Grushin differential operator in Banach spaces</i>	31 - 37
NICOLETA BREAZ and RABHA M. EL-ASHWAH <i>Quasi-Hadamard product of some uniformly analytic and p-valent functions with negative coefficients</i>	39 - 45
JANUSZ BRZDĘK <i>Note on stability of the Cauchy equation – an answer to a problem of Th. M. Rassias</i>	47 - 54
JAN ČERMÁK and JIŘÍ JÁNSKÝ <i>On a generalization of the Levin-May Theorem</i>	55 - 62
SEONG-HOON CHO <i>A fixed point theorem for a Ćirić-Berinde type mapping in orbitally complete metric spaces</i>	63 - 70
S. S. DRAGOMIR <i>Superadditivity and subadditivity of some functionals with applications to inequalities</i> ...	71 - 78
ARTŪRAS DUBICKAS <i>Distribution of some quadratic linear recurrence sequences modulo 1</i>	79 - 86
MARIA ILCA and DORIAN POPA <i>On approximate Cobb-Douglas production functions</i>	87 - 92
XIAOJIE LIN, BENSHENG ZHAO and ZENGJI DU <i>A third-order multi-point boundary value problem at resonance with one three dimensional kernel space</i>	93 - 100
MIHAELA MIHOLCA <i>Vector variational-like inequalities and vector optimization problems</i>	101 - 108
S. MIRVAKILI and B. DAVVAZ <i>On some combinatorial aspects of transposition n-ary hypergroups</i>	109 - 116
MARIA TALPĂU DIMITRIU <i>The least r-concave majorant of the continuity modulus ω_r</i>	117 - 122
NASSER-EDDINE TATAR <i>Control of systems with Hölder continuous functions in the distributed delays</i>	123 - 128
