

J. M. ALMIRA and KH. F. ABU-HELAIEL <i>On Montel's theorem in several variables</i> .....	1 - 10
I. K. ARGYROS, J. A. EZQUERRO, M. A. HERNÁNDEZ, S. HILOUT, N. ROMERO and A. I. VELASCO <i>Expanding the applicability of secant-like methods for solving nonlinear equations</i> .....	11 - 30
A. R. BAIAS and T. TRIF <i>Extensions of closed convex processes</i> .....	31 - 37
SIMION BREAZ <i>Finite torsion-free rank endomorphism rings</i> .....	39 - 43
DOINA CARP, CONSTANTIN POPA and CRISTINA SERBAN <i>Modified Han algorithm for inconsistent linear inequalities</i> .....	45 - 52
PAULA CURT <i>On some invariant geometric properties in Hele-Shaw flows with small surface tension</i> ..	53 - 60
MARIANA DUMITRU, LAURA NĂSTĂSESCU and BOGDAN TOADER <i>On the category of near-rings</i> .....	61 - 68
J. DŽURINA and B. BACULÍKOVÁ <i>Oscillation of the even - order delay linear differential equation</i> .....	69 - 76
AMAR OULD-HAMMOUDA and RACHAD ZAKI <i>Homogenization of a class of elliptic problems with nonlinear boundary conditions in domains with small holes</i> .....	77 - 88
SANDA MICULA <i>On spline collocation and the Hilbert transform</i> .....	89 - 95
OANA MLEȘNIȚE <i>Covering mappings and Ulam-Hyers stability results for coincidence problems</i> .....	97 - 104
SOFIYA OSTROVSKA and MEHMET TURAN <i>Qualitative results on the convergence of the <math>q</math>-Bernstein polynomials</i> .....	105 - 110
COSMIN PELEA, IOAN PURDEA and LIANA STANCA <i>Factor multialgebras, universal algebras and fuzzy sets</i> .....	111 - 118
SATISH SHUKLA and MUJAHID ABBAS <i>Fixed point results of cyclic contractions in product spaces</i> .....	119 - 126
DARIUSZ WARDOWSKI and NGUYEN VAN DUNG <i>A note on fixed point theorems in metric spaces</i> .....	127 - 134
ZHE YANG <i>Existence of solutions for a system of quasi-variational relation problems and some applications</i> .....	135 - 142
