

| | |
|--|-----------|
| VASILE BERINDE | |
| <i>CJM celebrates 25 years of publication of its new series</i> | i - vi |
| MIRCEA BALAJ | |
| <i>Systems of variational relations with lower semicontinuous set-valued mappings</i> | 269 - 275 |
| VASILE BERINDE and MĂDĂLINA PĂCURAR | |
| <i>A constructive approach to coupled fixed point theorems in metric spaces</i> | 277 - 287 |
| VASILE BERINDE and MIHAELA ANCUȚA PETRIC | |
| <i>Fixed point theorems for cyclic non-self single-valued almost contractions</i> | 289 - 296 |
| FLORIN BOJOR and MAGNOLIA TILCA | |
| <i>Fixed point theorems for Zamfirescu mappings in metric spaces endowed with a graph</i> . | 297 - 305 |
| PARIN CHAIPUNYA and POOM KUMAM | |
| <i>Common fixed points for an uncountable family of weakly contractive operators</i> | 307 - 312 |
| MITROFAN M. CHOBAN | |
| <i>Fixed points for mappings defined on generalized gauge spaces</i> | 313 - 324 |
| HAFIZ FUKHAR-UD-DIN | |
| <i>Common fixed points of two finite families of nonexpansive mappings by iterations</i> | 325 - 331 |
| J. HARJANI, J. ROCHA and K. SADARANGANI | |
| <i>On a generalized coupled fixed point theorem in $C[0, 1]$ and its application to a class of coupled systems of functional-integral equations</i> | 333 -337 |
| ERDAL KARAPINAR | |
| <i>Some fixed points results on Branciari metric spaces via implicit functions</i> | 339 - 348 |
| ABDUL RAHIM KHAN, MUJAHID ABBAS and YEKINI SHEHU | |
| <i>A general convergence theorem for multiple-set split feasibility problem in Hilbert spaces</i> | 349 - 357 |
| POOM KUMAM and CHIRASAK MONGKOLKEHA | |
| <i>Common best proximity points for proximity commuting mapping with Geraghty's functions</i> | 359 - 364 |
| VIORICA MUREȘAN and ANTON S. MUREȘAN | |
| <i>On the theory of fixed point theorems for convex contraction mappings</i> | 365 - 371 |
| MONICA PATRICHE | |
| <i>Fixed point theorems for correspondences with properties weaker than lower semicontinuity</i> | 373 - 380 |
| OVIDIU POPESCU | |
| <i>A new type of contractions that characterize metric completeness</i> | 381 - 387 |
| WARUT SAKSIRIKUN and NARIN PETROT | |
| <i>Some fixed point theorems via partial order relations without the monotone property</i> ... | 389 - 394 |
| WUTIPHOL SINTUNAVARAT | |
| <i>A new approach to α-ψ-contractive mappings and generalized Ulam-Hyers stability, well-posedness and limit shadowing results</i> | 395 - 401 |
| FRANCESCA VETRO | |
| <i>A generalization of Nadler fixed point theorem</i> | 403 - 410 |
