

OCTAVIAN AGRATINI and VIJAY GUPTA	
<i>On the uniform convergence of a <math>q</math>-series</i> .....	141 - 146
ISHAK ALTUN and GÜLHAN MINAK	
<i>An extension of Assad-Kirk's fixed point theorem for multivalued nonself mappings</i> ...	147 - 155
ROBERTA BUCUR and DANIEL BREAZ	
<i>Univalence conditions and properties of a new general integral operator</i> .....	157 - 164
TEODORA CĂTINAȘ, DIANA OTROCOL and IOAN A. RUS	
<i>The iterates of positive linear operators with the set of constant functions as the fixed point set</i> .....	165 - 172
MITROFAN M. CHOBAN	
<i>Fixed points of mappings defined on spaces with distance</i> .....	173 - 188
MIRCEA CRASMAREANU and LAURIAN-IOAN PIȘCORAN	
<i>Ricci solitons on CR submanifolds of maximal CR dimension in complex projective space</i> .....	189-193
MARIA JOIȚA and RADU-B. MUNTEANU	
<i>Crossed products of Hilbert pro-<math>C^*</math>-bimodules and associated pro-<math>C^*</math>-algebras</i> .....	195 - 201
GRADIMIR V. MILOVANOVIĆ and MILOLJUB ALBIJANIĆ	
<i>A generalized Birkhoff–Young quadrature formula</i> .....	203 - 213
DIJANA MOSIĆ and DRAGAN S. DJORDJEVIĆ	
<i>Some additive results for the <math>Wg</math>-Drazin inverse of Banach space operators</i> .....	215 - 223
PETRICA POP, OLIVIU MATEI, CORINA POP SITAR and IOANA ZELINA	
<i>A hybrid based genetic algorithm for solving a capacitated fixed-charge transportation problem</i> .....	225-232
DIANA SAVIN	
<i>About division quaternion algebras and division symbol algebras</i> .....	233 - 240
T. M. M. SOW, N. DJITTE and C. E. CHIDUME	
<i>A path convergence theorem and construction of fixed points for nonexpansive mappings in certain Banach spaces</i> .....	241 - 250
JANEZ ŠTER	
<i>Rings in which nilpotents form a subring</i> .....	251 - 258
GUOWEI ZHANG and PENGCHENG LI	
<i>On nonconvex retracts in normed linear spaces</i> .....	259 - 264
BOYAN ZLATANOV	
<i>Error estimates for approximating best proximity points for cyclic contractive maps</i> ..	265 - 270
