

VASILE BERINDE and MĂDĂLINA PĂCURAR <i>A glance into the beauty of Fixed Point Theory: Professor Emeritus Ioan A. Rus on his 80th anniversary</i>	i - viii
M. R. ALFURAIDAN <i>Retraction method in fixed point theory for monotone nonexpansive mappings</i>	271 - 276
GHEORGHE ARDELEAN, OVIDIU COSMA and LASZLO BALOG <i>A comparison of some fixed point iteration procedures by using the basins of attraction</i> .	277 - 284
AREERAT ARUNCHAI and SOMYOT PLUBTIENG <i>Caristi's random fixed point theorem for generalized distance on Polish spaces</i>	285 - 292
LASZLO BALOG and VASILE BERINDE <i>Fixed point theorems for nonself Kannan type contractions in Banach spaces endowed with a graph</i>	293 - 302
PORNPIMON BORIWAN, NARIN PETROT and SUTHEP SUANTAI <i>Fixed point theorems for Prešić almost contraction mappings in orbitally complete metric spaces endowed with directed graphs</i>	303 - 313
HAFIZ FUKHAR-UD-DIN, VASILE BERINDE and ABDUL RAHIM KHAN <i>Fixed point approximation of Prešić nonexpansive mappings in product of CAT (0) spaces</i>	315 - 322
G. GARCÍA <i>Coupled fixed points and α-dense curves</i>	323 - 330
ANDREI HORVAT-MARC and MIHAELA PETRIC <i>Examples of cyclical operators</i>	331 - 338
MOHAMED JLELI and BESSEM SAMET <i>An improvement result concerning fixed point theory for cyclic contractions</i>	339 - 347
ADRIAN PETRUȘEL, GABRIELA PETRUȘEL and JEN-CHIH YAO <i>A study of a system of operator inclusions via a fixed point approach and applications to functional-differential inclusions</i>	349 - 361
BESSEM SAMET <i>On the approximation of fixed points for a new class of generalized Berinde mappings</i> ..	363 - 374
JUKRAPONG TIAMMEE, YEOL JE CHO and SUTHEP SUANTAI <i>Fixed point theorems for nonself G-almost contractive mappings in Banach spaces endowed with graphs</i>	375 - 382
