

MARGARETA-ELIZA BALAZS	
<i>Maia-Perov type fixed point results for Prešić type operators</i> .....	265 - 274
MITROFAN M. CHOBAN and VASILE BERINDE	
<i>A general concept of multiple fixed point for mappings defined on spaces with a distance</i> .....	275 - 286
PREEYANUCH CHUASUK, ALI FARAJZADEH, ANCHALEE KAEWCHAROEN and RAVI P. AGARWAL	
<i>An iterative process for a hybrid pair of a Bregman strongly nonexpansive single-valued mapping and a finite family of Bregman relative nonexpansive multi-valued mappings in Banach spaces</i> .....	287 - 300
MELÁNIA-IULIA DOBRICAN	
<i>Fixed point theorems for a pair of single-valued operators in a metric space endowed with a reflexive relation</i> .....	301 - 310
EZGI ERDOĞAN and VATAN KARAKAYA	
<i>Operator ideal of <math>s</math>-type operators using weighted mean sequence space</i> .....	311 - 318
EMIRHAN HACIOĞLU and VATAN KARAKAYA	
<i>Existence and convergence for a new multivalued hybrid mapping in <math>CAT(\kappa)</math> spaces</i> ...	319 - 326
ABDUL RAHIM KHAN, HAFIZ FUKHAR-UD-DIN and NUSRAT YASMIN	
<i>Approximating common fixed point of asymptotically nonexpansive mappings without convergence condition</i> .....	327 - 334
M. A. KHAMSI and A. R. KHAN	
<i>Goebel and Kirk fixed point theorem for multivalued asymptotically nonexpansive mappings</i> .....	335 - 342
ELISABETH KÖBIS and CHRISTIANE TAMMER	
<i>Robust vector optimization with a variable domination structure</i> .....	343 - 351
XIAOLONG QIN, QAMRUL HASAN ANSARI and JEN-CHIH YAO	
<i>A forward-backward iterative method for zero points of sum of two accretive operators</i> ..	353 - 363
PETRICĂ C. POP, C. SABO, B. BIESINGER, BIN HU and G. R. RAIDL	
<i>Solving the Two-Stage Fixed-Charge Transportation Problem with a Hybrid Genetic Algorithm</i> .....	365 - 371
AHMET SAHINER, NURULLAH YILMAZ and GULDEN KAPUSUZ	
<i>A descent global optimization method based on smoothing techniques via Bezier curves</i>	373 - 380
CRISTINA ȚICALĂ	
<i>Approximating fixed points of asymptotically demicontractive mappings by iterative schemes defined as admissible perturbations</i> .....	381 - 388
XIAONAN YANG and HONG-KUN XU	
<i>Projection algorithms for composite minimization</i> .....	389 - 397
