

ANA MARIA ACU and P. N. AGRAWAL <i>Better approximation of functions by genuine Bernstein-Durrmeyer type operators</i> . . . .	125 - 136
ŠTEFAN BEREŽNÝ and MICHAL STAŠ <i>Cyclic permutations and crossing numbers of join products of two symmetric graphs of order six</i> . . . . .	137 - 146
LARISA CHEREGI and VICUȚA NEAGOȘ <i>A generalization of the Pompeiu mean-value theorem to compact sets</i> . . . . .	147 - 152
OVIDIU COSMA, PETRICĂ C. POP and CORINA POP SITAR <i>An efficient iterated local search heuristic algorithm for the two-stage fixed-charge transportation problem</i> . . . . .	153 - 164
NICOLAIE LUNGU and DANIELA MARIAN <i>Ulam-Hyers-Rassias stability of some quasilinear partial differential equations of first order</i> . . . . .	165 - 170
DIJANA MOSIĆ <i>Weighted G-Drazin inverse for operators on Banach spaces</i> . . . . .	171 - 184
ADRIAN PETRUȘEL, GABRIELA PETRUȘEL and JEN-CHIH YAO <i>Coupled fixed point theorems in quasimetric spaces without mixed monotonicity</i> . . . . .	185 - 192
HABIB UR REHMAN, POOM KUMAM and SOMPONG DHOMPONGSA <i>Existence of tripled fixed points and solution of functional integral equations through a measure of noncompactness</i> . . . . .	193 - 208
IOAN A. RUS <i>Convergence results for fixed point iterative algorithms in metric spaces</i> . . . . .	209 - 220
AYNUR ŞAHİN <i>Some new results of M-iteration process in hyperbolic spaces</i> . . . . .	221 - 232
MURAT SARI, SHKO ALI TAHIR and ABDERRAHMAN BOUHAMIDI <i>Behaviour of advection-diffusion-reaction processes with forcing terms</i> . . . . .	233 - 252
NITHIRAT SISARAT, RABIAN WANGKEEREE and GUE MYUNG LEE <i>Sequential characterizations of robust optimal solutions in uncertain convex programs via perturbation approach</i> . . . . .	253 - 262
