

S. AL-HOMIDAN, B. ALI and Y. I. SULEIMAN <i>An iterative method for solving multiple-set split feasibility problems in Banach spaces ...</i>	01 - 13
TRUONG QUANG BAO <i>Fréchet vector subdifferential calculus .....</i>	15 - 26
VASILE BERINDE <i>Approximating fixed points of enriched nonexpansive mappings in Banach spaces by using a retraction-displacement condition .....</i>	27 - 34
LIMPAPAT BUSSABAN, SUTHEP SUANTAI and ATTAPOL KAEWKHAO <i>A parallel inertial S-iteration forward-backward algorithm for regression and classification problems .....</i>	35 - 44
TAO CHEN, NAN-JING HUANG and YI-BIN XIAO <i>A class of parabolic evolutionary quasivariational inequalities in contact mechanics .....</i>	45 - 57
C. E. CHIDUME, G. S. DE SOUZA, U. V. NNYABA, O. M. ROMANUS and A. ADAMU <i>Approximation of zeros of m-accretive mappings, with applications to Hammerstein integral equations .....</i>	59 - 69
HAFIZ FUKHAR-UD-DIN <i>Existence and approximation of a fixed point of a fundamentally nonexpansive mapping in hyperbolic spaces .....</i>	71 - 80
THANOMSAK LAOKUL and BANCHA PANYANAK <i>A generalization of the (CN) inequality and its applications .....</i>	81 - 90
JIRAPRAPA MUNKONG, BUI VAN DINH and KASAMSUK UNGCHITTRAKOOL <i>An inertial extragradient method for solving bilevel equilibrium problems .....</i>	91 - 107
LUONG V. NGUYEN and XIAOLONG QIN <i>Weak sharpness for solutions of nonsmooth variational inequalities and applications ...</i>	109 - 117
M. O. NNAKWE <i>Solving split generalized mixed equality equilibrium problems and split equality fixed point problems for nonexpansive-type maps .....</i>	119 - 126
ANANTACHAI PADCHAROEN and KAMONRAT SOMBUT <i>Modified inertial double Mann type iterative algorithm for a bivariate weakly nonexpansive operator .....</i>	127 - 139
SIMEON REICH and ALEXANDER J. ZASLAVSKI <i>Inexact descent methods for convex minimization problems in Banach spaces .....</i>	141 - 146
YAQIN WANG, YANLAI SONG, XIAOLI FANG and TAE-HWA KIM <i>Split equality fixed point problems for asymptotically quasi-pseudocontractive operators</i>	147 - 157
CUIJIE ZHANG, QIAO-LI DONG and JIAJIA CHEN <i>Multi-step inertial proximal contraction algorithms for monotone variational inclusion problems .....</i>	159 - 177
