

VASILE BERINDE

Carpathian Journal of Mathematics celebrates 30 years of publication i - iv

MARAT AKHMET, MADINA TLEUBERGENOVA and AKYLBK ZHAMANSHIN

Quasilinear differential equations with strongly unpredictable solutions 341 - 349

ANDREI ALEXANDRU and GABRIEL CIOBANU

Uniformly supported sets and fixed points properties 351 - 364

I. K. ARGYROS, R. P. IAKYMCHUK, S. M. SHAKHNO and H. P. YARMOLA

On an improved convergence analysis of a two-step Gauss-Newton type method under generalized Lipschitz conditions 365 - 372

CAMELIA BĂRBATU and DANIEL BREAZ

New univalence criteria for an integral operator with Mocanu's and Šerb's lemma 373 - 379

ŠTEFAN BEREŽNÝ and MICHAL STAŠ

On the crossing number of join of the wheel on six vertices with the discrete graph 381 - 390

GRIGORE CĂLUGĂREANU and HORIA F. POP

Trace $1, 2 \times 2$ matrices over principal ideal domains are exchange 391 - 399

OVIDIU COSMA, PETRICĂ C. POP and IOANA ZELINA

A novel genetic algorithm for solving the clustered shortest-path tree problem 401 - 414

SORIN G. GAL and IONUȚ T. IANCU

Quantitative approximation by nonlinear convolution operators of Landau-Choquet type 415 - 422

VIJAY GUPTA

A generalized class of integral operators 423 - 431

ERDAL KARAPINAR, ADRIAN PETRUȘEL and GABRIELA PETRUȘEL

On admissible hybrid Geraghty contractions 433 - 442

JUTAMAS KERDKAEW, RABIAN WANGKEEREE and GUE MYUNG LEE

On optimality conditions for robust weak sharp solution in uncertain optimizations ... 443 - 452

RODICA LUCA

Existence of solutions for a fractional nonlocal boundary value problem 453 - 462

MARIN MARIN, ANDREAS ÖCHSNER and SORIN VLASE

Effect of voids in a heat-flux dependent theory for thermoelastic bodies with dipolar structure 463 - 474

HONG-KUN XU, NAJLA ALTWAIJRY and SOUHAIL CHEBBI

An iterative regularization method for variational inequalities in Hilbert spaces 475 - 482
