

JAMILU ABUBAKAR, POOM KUMAM, ABOR ISA GARBA, MUHAMMAD SIRAJO ABDULLAHI, ABDULKARIM HASSAN IBRAHIM and KANOKWAN SITHITHAKERNGKIET
An inertial iterative scheme for solving variational inclusion with application to Nash-Cournot equilibrium and image restoration problems 361 - 380

ABUBAKAR ADAMU and AISHA A. ADAM
Approximation of solutions of split equality fixed point problems with applications 381 - 392

SULIMAN AL-HOMIDAN, QAMRUL HASAN ANSARI and MONIRUL ISLAM
Existence results and two step proximal point algorithm for equilibrium problems on Hadamard manifolds 393 - 406

SHAHRAM BANAEL, VAHID PARVANEH and MOHAMMAD MURSALEEN
Measures of noncompactness and infinite systems of integral equations of Urysohn type in $L^\infty(\mathfrak{G})$ 407 - 416

PORNPIMON BORIWAN, DAISHI KUROIWA and NARIN PETROT
On the properties of lexicographic tolerable robust solution sets for uncertain multi-objective optimization problems 417 - 426

DRAGOȘ-PĂTRU COVEI and TRAIAN A. PIRVU
A stochastic control problem with regime switching 427 - 440

HOSSEIN FAZLI, HONGGUANG SUN, SIMA AGHCHI and JUAN J. NIETO
On a class of nonlinear nonlocal fractional differential equations 441 - 448

PACHARA JAILOKA, SUTHEP SUANTAI and ADISAK HANJING
A fast viscosity forward-backward algorithm for convex minimization problems with an application in image recovery 449 - 461

YASUNORI KIMURA
Resolvents of equilibrium problems on a complete geodesic space with curvature bounded above .. 463 - 476

M. O. NNAKWE and J. N. EZEORA
Strong convergence theorems for variational inequalities and fixed point problems in Banach spaces 477 - 487

MASAKAZU ONITSUKA
Instability of second-order nonhomogeneous linear difference equations with real-valued coefficients 489 - 495

ANANTACHAI PADCHAROEN and DUANGKAMON KITKUAN
Iterative methods for optimization problems and image restoration 497 - 512

JENJIRA PUIWONG and SATIT SAEJUNG
On convergence theorems for single-valued and multi-valued mappings in \mathbf{p} -uniformly convex metric spaces 513 - 527

THANATCHAPORN SIRICHUNWIJIT, RABIAN WANGKEEREE and NITHIRAT SISARAT
Approximate optimality and approximate duality in nonsmooth composite vector optimization ... 529 - 540

YONGHONG YAO, NASEER SHAHZAD and JEN-CHIH YAO
Convergence of Tseng-type self-adaptive algorithms for variational inequalities and fixed point problems 541 - 550
