

ABUBAKAR ADAMU, POOM KUMAM, DUANGKAMON KITKUAN and ANANTACHAI PADCHAROEN
Relaxed modified Tseng algorithm for solving variational inclusion problems in real Banach spaces with applications 1 - 26

SUPARAT BAIYA, AND KASAMSUK UNGCHITTRAKOOL
Modified inertial Mann’s algorithm and inertial hybrid algorithm for k -strict pseudo-contractive mappings 27 - 43

YIRGA ABEBE BELAY, HABTU ZEGEYE, AND OGANEDITSE A. BOIKANYO
Solutions of Split Equality Hammerstein Type Equation Problems in Reflexive Real Banach Spaces 45 - 72

VASILE BERINDE
Approximating fixed points results for demicontractive mappings could be derived from their quasi-nonexpansive counterparts 73 - 84

MONICA-FELICIA BOTA, LILIANA GURAN, AND GABRIELA PETRUȘEL,
Fixed points and coupled fixed points in b -metric spaces via graphical contractions 85 - 94

PARIN CHAIPUNYA, NANTAPORN CHUENSUPANTHARAT AND PRINTAPORN SANGUANSUTTIGUL
Graphical Ekeland’s variational principle with a generalized w -distance and a new approach to... 95 - 107

CHARLES CHIDUME
Geometric inequalities in real Banach spaces with applications 109 - 124

DAWAN CHUMPUNGAM, PANITARN SARINMETA, AND SUTHEP SUANTAI
A New Accelerated Viscosity Forward-backward Algorithm with a Linesearch for Some Convex Minimization Problems and its Applications to Data Classification 125 - 138

QIAO-LI DONG, YU PENG
Alternated inertial simultaneous and semi-alternating projection algorithms for solving the split equality probl . 139 - 160

CRISTINA FLAUT
Some applications of idempotent elements in MV algebras 161 - 174

MAXIM KOROLEV, AND ANTANAS LAURINCİKAS
Joint approximation of analytic functions by shifts of the Riemann zeta-function twisted by the Gram function . 175 - 187

THANASAK MOUKTONGLANG, KANYUTA POOCHINAPAN, AND RAWEEROTE SUPARATULATORN
A parallel method for common variational inclusion and common fixed point problems with applications 189 - 200

P.U. NWOKORO, D. F. AGBEBAKU, E.E. CHIMA, A.C. ONAH, O.U. OGUGUO, AND M.O. OSILIKE
Inertial Iteration Scheme for Approximating Fixed Points of Lipschitz Pseudocontractive Maps in Arbitrary... . 201 - 212

BILAL A. RATHER, HILAL A. GANIE, AND MUSTAPHA AOUCHICHE
On normalized distance Laplacian eigenvalues of graphs and applications to graphs defined on groups and rings 213 - 230

SIMEON REICH, AND ALEXANDER J. ZASLAVSKI
Most continuous and increasing functions have two different fixed points 231 - 236

SANI SALISU, POOM KUMAM, AND SONGPON SRIWONGSA
On Fixed Points of Enriched Contractions and Enriched Nonexpansive Mappings 237 - 254

LASZLO SZALAY, AND FLORIAN LUCA
Diophantine triples with distinct binary recurrences 255 - 264

MADINA TLEUBERGENOVA, DUYGU ARUGASLAN CINCIN, ZAKHIRA NUGAYEVA, AND MARAT AKHMET
Unpredictable solutions of quasilinear differential equations with generalized piecewise constant arguments of mixed type 265 - 280

MARKJOE O. UBA, MARIA A. ONYIDO, CYRIL I. UDEANI, AND PETER U. NWOKORO
A hybrid scheme for fixed points of a countable family of generalized nonexpansive-type maps and finite families of variational inequality and equilibrium problems, with applications 281 - 292

CHANG-JIAN ZHAO
The affine Orlicz log-Minkowski inequality 293 - 302

YASIR ARFAT, POOM KUMAM, MUHAMMAD AQEEL AHMAD KHAN AND YEOL JE CHO
A Hybrid Steepest-Descent Algorithm for Convex Minimization Over the Fixed Point Set of Multivalued 303 - 314

JIAOJIAO WANG AND HONG-KUN XU
Stepsize Choice for Korpelevich’s and Popov’s Extragradient Algorithms for Convex-Concave Minimax Problems 315 - 323

M.M. SOW, AMINATA DIOP DIENE AND N. DJITTE
A novel approach for solving simultaneously one-parameter nonexpansive semigroup, convex minimization and fixed point problems involving set-valued operators 325 - 334

QAMRUL HASAN ANSARI, JAVAD BALOOEE AND SULIMAN AL-HOMIDAN
An iterative method for variational inclusions and fixed points of total uniformly L -Lipschitzian mappings 335 - 348
