

VASILE BERINDE and MĂDĂLINA PĂCURAR <i>The early developments in fixed point theory on <math>b</math>-metric spaces: a brief survey and some important related aspects</i> .....	523 - 538
OCTAVIAN AGRATINI and RADU PRECUP <i>Iterates of multidimensional approximation operators via Perov theorem</i> .....	539 - 546
LUMINIȚA BARBU and GHEORGHE MOROȘANU <i>Eigenvalues of the <math>(p, q, r)</math>-Laplacian with a parametric boundary condition</i> .....	547 - 561
O. CĂRJĂ and A. I. LAZU <i>Feedback null controllability for a class of semilinear control systems</i> .....	563 - 571
RONG HU, MIRCEA SOFONEA and YI-BIN XIAO <i>A Fixed Point Approach of Variational-Hemivariational Inequalities</i> .....	573 - 581
RADU MICULESCU, ALEXANDRU MIHAIL and IRINA SAVU <i>A characterization of fuzzy fractals generated by an orbital fuzzy iterated function system</i> .....	583 - 595
CRISTINA-LILIANA PRIPOAE, IULIA-ELENA HIRICA, GABRIEL- TEODOR PRIPOAE and VASILE PEDA <i>Lie symmetries of the nonlinear Fokker-Planck equation based on weighted Tsallis entropy</i> .....	597 - 617
LAURIAN SUCIU <i>Operators with Brownian unitary dilations</i> .....	619 - 630
DAN TIBA <i>Periodic solutions for certain Hamiltonian systems in arbitrary dimension and global parametrization of some manifolds</i> .....	631 - 640
ADRIAN NICOLAE BRANGA and ION MARIAN OLARU <i>Some Fixed Point Results in Spaces with Perturbed Metrics</i> .....	641 - 654
AURELIAN CERNEA <i>On certain boundary value problems associated to some fractional integro-differential inclusions</i> .....	655 - 661
DAVOR DRAGIČEVIĆ, ADINA LUMINIȚA SASU and BOGDAN SASU <i>On Polynomial Dichotomies of Discrete Nonautonomous Systems on the Half-Line</i> .....	663 - 680
LOREDANA CAMELIA CULDA, EVA KASLIK and MIHAELA NEAMȚU <i>A dynamic Cournot mixed oligopoly model with time delay for competitors</i> .....	681 - 690
NICOLAE LUPA and LIVIU HORIA POPESCU <i>Generalized exponential behavior on the half-line via evolution semigroups</i> .....	691 - 705
ADRIAN PETRUȘEL and GABRIELA PETRUȘEL <i>Common fixed point theory for a pair of multivalued operators</i> .....	707 - 714
CONSTANTIN FETECAU and DUMITRU VIERU <i>General analytical solution of fractional Klein–Gordon equation in a spherical domain</i> .....	715 - 723
VASILE DRĂGAN, IOAN-LUCIAN POPA and IVAN G. IVANOV <i>A linear quadratic tracking problem for stochastic systems controlled by impulses. The finite horizon time case</i> .....	725 - 735
DAVOR DRAGIČEVIĆ, ADINA LUMINIȚA SASU and BOGDAN SASU <i>Admissibility and Polynomial Dichotomy of Discrete Nonautonomous Systems</i> .....	737 - 762
A.-D. FILIP and I. A. RUS <i>A case study in set-mapping pair theory: the set-mapping pair bijections</i> .....	763 - 768
LIVIU CĂDARIU and LAURA MANOLESCU <i>Fixed points and the stability of the linear functional equations in a single variable</i> .....	769 - 776
LARISA ELENA BIRIȘ, TRAIAN CEAUȘU, IOAN-LUCIAN POPA and NICOLAE MARIAN SEIMEA <i>Lyapunov Conditions for One-Sided Discrete-Time Random Dynamical Systems</i> .....	777 - 788
ROVANA BORUGA (TOMA), MIHAIL MEGAN and DANIELA MARIA-MAGDALENA TOH <i>On Uniform Instability with Growth Rates in Banach Spaces</i> .....	789 - 796
ALEXANDRU-DARIUS FILIP <i>Fixed point theorems for nonself generalized contractions on a large Kasahara space</i> .....	797 - 807
CLAUDIA LUMINIȚA MIHIȚ <i>On uniform polynomial trichotomy of skew-evolution semiflows</i> .....	809 - 816
ANTÓNIO J. G. BENTO <i>Invariant manifolds for difference equations with generalized trichotomies</i> .....	817 - 835
THANASAK MOUKTONGLANG, RAWEEROTE SUPARATULATORN AND CHOONKIL PARK <i>Hyers-Ulam stability of hom-derivations in Banach algebras</i> .....	837 - 844
