

ŞAHSENE ALTINKAYA and SIBEL YALÇIN <i>Hankel determinant for m-fold symmetric bi-univalent functions</i>	01 - 08
DORIN ANDRICA and DAN ŞTEFAN MARINESCU <i>Sequences interpolating some geometric inequalities</i>	09 - 18
IOANNIS K. ARGYROS and SANTHOSH GEORGE <i>Convergence of derivative free iterative methods</i>	19 - 26
DAN BĂRBOSU and VASILE BERINDE <i>On the computation of the antiderivatives on \mathbb{R} of a class of continuous periodic functions</i>	27 - 32
VASILE BERINDE, ŞTEFAN MĂRUŞTER and IOAN A. RUS <i>On an open problem regarding the spectral radius of the derivatives of a function and of its iterates</i>	33 - 39
A. BHARALI and NIJARA KONCH <i>Some results on augmented Zagreb index of some trees and unicyclic graphs</i>	41 - 47
ELENA CEBOTARU <i>Geometrical characteristics of the stability domain in the restricted problem of eight bodies</i>	49 - 52
MITROFAN M. CHOBAN and LARISA M. SALI <i>On solutions of functional equations with polynomial translations</i>	53 - 59
ÖMER KIŞI <i>On Wijsman asymptotically lacunary \mathcal{I}-statistical equivalence of weight g of sequence of sets</i>	61 - 68
V. LOKESHA, K. ZEBI YASMEEN and T. DEEPIKA <i>Some computational aspects of carbon nanocone using $Q(G)$ operator, hexagonal network and probabilistic neural network</i>	69 - 76
CAMELIA-M. PINTEA, BARNA IANTOVICS, PETRICĂ C. POP and MATTHIAS DEHMER <i>Escape from solutions stagnation. A Study on Ant System solving TSP</i>	77 - 83
YAŞAR POLATOĞLU, ASENA ÇETINKAYA and OYA MERT <i>Some properties of the analytic functions with bounded radius rotation</i>	85 - 90
AYNUR ŞAHİN, HAKAN ARISOY and ZEYNEP KALKAN <i>On the stability of two functional equations arising in mathematical biology and theory of learning</i>	91 - 95
