

IOANNIS K. ARGYROS and SANTHOSH GEORGE <i>Ball convergence theorem for inexact Newton methods in Banach space</i>	113 - 120
IBRAHIMA MOULAYE BADJI, ABDOUL SALAM DIALLO, BAKARY MANGA and ALASSANE SY <i>On L_3-affine surfaces</i>	121 - 129
M. IMRAN BHAT, S. PIRZADA and AHMAD M. ALGHAMDI <i>On planarity of compressed zero-divisor graphs associated to commutative rings</i>	131 - 136
M. IHIA and O. KHADIR <i>A resistant digital signature based on elliptic curves</i>	137 - 144
ADAMA KABORE and STANISLAS OUARO <i>Nonlinear elliptic anisotropic problem involving non-local boundary conditions with variable exponent and graph data</i>	145 - 152
SÁNDOR NAGYDOBAI KISS <i>A relation between the Brocard and Miquel Angles</i>	153 - 160
DAN ŞTEFAN MARINESCU and MIHAI MONEA <i>Some regularity properties of the functions obtained from some algebraic properties</i>	161 - 164
FATIH NURAY, ERDİNÇ DÜNDAR and UĞUR ULUSU <i>Some generalized definitions of uniform continuity for real valued functions</i>	165 - 170
SAMPA PAHAN <i>Warped product pointwise bi-slant submanifolds of trans-Sasakian manifold</i>	171 - 182
DILIP CHANDRA PRAMANIK and KAPIL ROY <i>Further study on solutions of some non-linear homogeneous differential equations in connection to Brück conjecture</i>	183 - 189
K. RAJENDRA PRASAD, MAHAMMAD KHUDDUSH and M. RASHMITA <i>Denumerably many positive solutions for fractional order boundary value problems</i>	191 - 203
SAIMA RASHID, AHMET OCAK AKDEMIR, MUHAMMAD ASLAM NOOR and KHALIDA INAYAT NOOR <i>New integral inequalities for geometrically convex functions via conformable fractional integral operators</i>	205 - 219
SMITHA ROSE and SUDEV NADUVATH <i>On equitable chromatic topological indices of some Mycielski graphs</i>	221 - 229
RITU SEN <i>Generalized semi-open sets via ideals in topological space</i>	231 - 236
BOGDAN D. SUCEAVĂ <i>The Cartan connection: sketches for a portrait of Kentaro Yano</i>	237 - 242
HAMID VAEZI and MOHAMAD NAGHLISAR <i>Weighted composition operators from Bloch-type into Bers-type spaces</i>	243 - 250
