

YUNUS ATALAN and VATAN KARAKAYA <i>Stability of nonlinear Volterra-Fredholm integro differential equation: A fixed point approach</i>	247 - 254
AHMET DAŞDEMİR <i>Dynamic response of a pre-stressed bi-layered plate-strip subjected to an arbitrary inclined time-harmonic force</i>	255 - 262
KADRI DOĞAN and VATAN KARAKAYA <i>Approximation of fixed point of accretive operators based on a Halpern-Type iterative method</i>	263 - 274
MERVE İLKHAN, METİN BAŞARIR and EMRAH EVREN KARA <i>A note on \mathcal{I}-convergence and \mathcal{I}^*-convergence of an infinite product</i>	275 - 279
RAMAZAN KAMA and BİLAL ALTAY <i>Some sequence spaces and completeness of normed spaces</i>	281 - 287
NAZLI KARACA, MUJAHID ABBAS and ISA YILDIRIM <i>Convergence of a Newton-like S-iteration process in \mathbb{R}</i>	289 - 296
MELTEM KAYA and HASAN FURKAN <i>Fixed point theorems for expansive mappings in G_p-metric spaces</i>	297 - 308
KERİM KOCA, İLKER GENÇTÜRK and MUSTAFA AYDIN <i>q-Greens' s formula on the complex plane in the sense of Harman</i>	309 - 320
ERHAN SET and BARIŞ ÇELİK <i>Certain Hermite-Hadamard type inequalities associated with conformable fractional integral operators</i>	321 - 330
AYNUR ŞAHİN and METİN BAŞARIR <i>Some convergence results for nonexpansive mappings in uniformly convex hyperbolic spaces</i>	331 - 338
HACER ŞENGÜL and MİKAIL ET <i>Lacunary statistical convergence of order (α, β) in topological groups</i>	339 - 344
ILKNUR YESİLCE and GABİL ADILOV <i>Fractional integral inequalities for \mathbb{B}-convex functions</i>	345 - 351
NIHAL YOKUS and NİMET COSKUN <i>Principal functions of discrete Sturm-Liouville equations with hyperbolic eigenparameter</i>	353 - 359
