

DORIN ANDRICA, OVIDIU BAGDASAR and DAN ȘTEFAN MARINESCU <i>The combinatorial nature of some trigonometric integrals</i>	133 - 139
VASILE BERINDE <i>A heuristic method for solving linear and quasi-linear first order partial differential equations</i>	141 - 152
KOSI R. ETSE, ANATÉ K. LAKMON and YAOGAN MENSAH <i>The Radon-Nikodým property for the Fourier space of some hypergroups</i>	153 - 164
GHANIA GUETTAI, DIFFALAH LAISSAOUI and MOURAD RAHMANI <i>Generalized Laguerre transforms of sequences</i>	165 - 171
SEEMA MEENA and D. B. OJHA <i>Some Hermite-Hadamard type Inequalities for E-preinvex Functions</i>	173 - 182
S. A. MORYE and S. R. CHAUDHARI <i>Properties of Restricted Cascade Product of Fuzzy Finite State Machines</i>	183 - 192
GEORGE PRECUPESCU <i>A Jensen-type inequality in the framework of 2-convex systems</i>	193 - 200
PREETHAM N. RAJ and HARINA P. WAGHAMORE <i>Uniqueness of Q-difference of meromorphic functions sharing a small function with finite weight</i>	201 - 218
OMPRAKASH SAHU, AMITABH BANERJEE and NIYATI GURUDWAN <i>Convergence Results for Mean Nonexpansive Mappings in Uniformly Convex Banach Space</i>	219 - 227
SADANANDAN SAJIKUMAR, SIVADASAN VINOD and GOPINADHAN SATHIKUMARI BIJU <i>Automorphisms of Automorphism Group of Dihedral Groups</i>	229 - 235
BOGDAN D. SUCEAVĂ and ANAEL VERDUGO <i>Nicole Oresme's Quest towards the Realm of Reality: Are There Any Precursory Themes of Applied Mathematics Present in His Works?</i>	237 - 246
APOLONIUSZ TYSZKA <i>Statements and open problems on decidable sets $\mathcal{X} \subseteq \mathbb{N}$ that contain informal notions and refer to the current knowledge on \mathcal{X}</i>	247 - 253
